Write On Your Walls

CINCH & SCRIBIL

MAGNETIC & DRY-ERASE WALLS

One surface - many uses. Any color.

Think of your walls as a blank canvas that can go as far as the imagination can take them. With **Cinch Magnetic Wallcovering and Scribil Dry-Erase Covering** by Vitrulan, we've combined form and function, allowing you to turn your walls into a writing and magnetic work area. Your walls are transformed into the perfect idea space – display whatever comes to mind.

CINCH

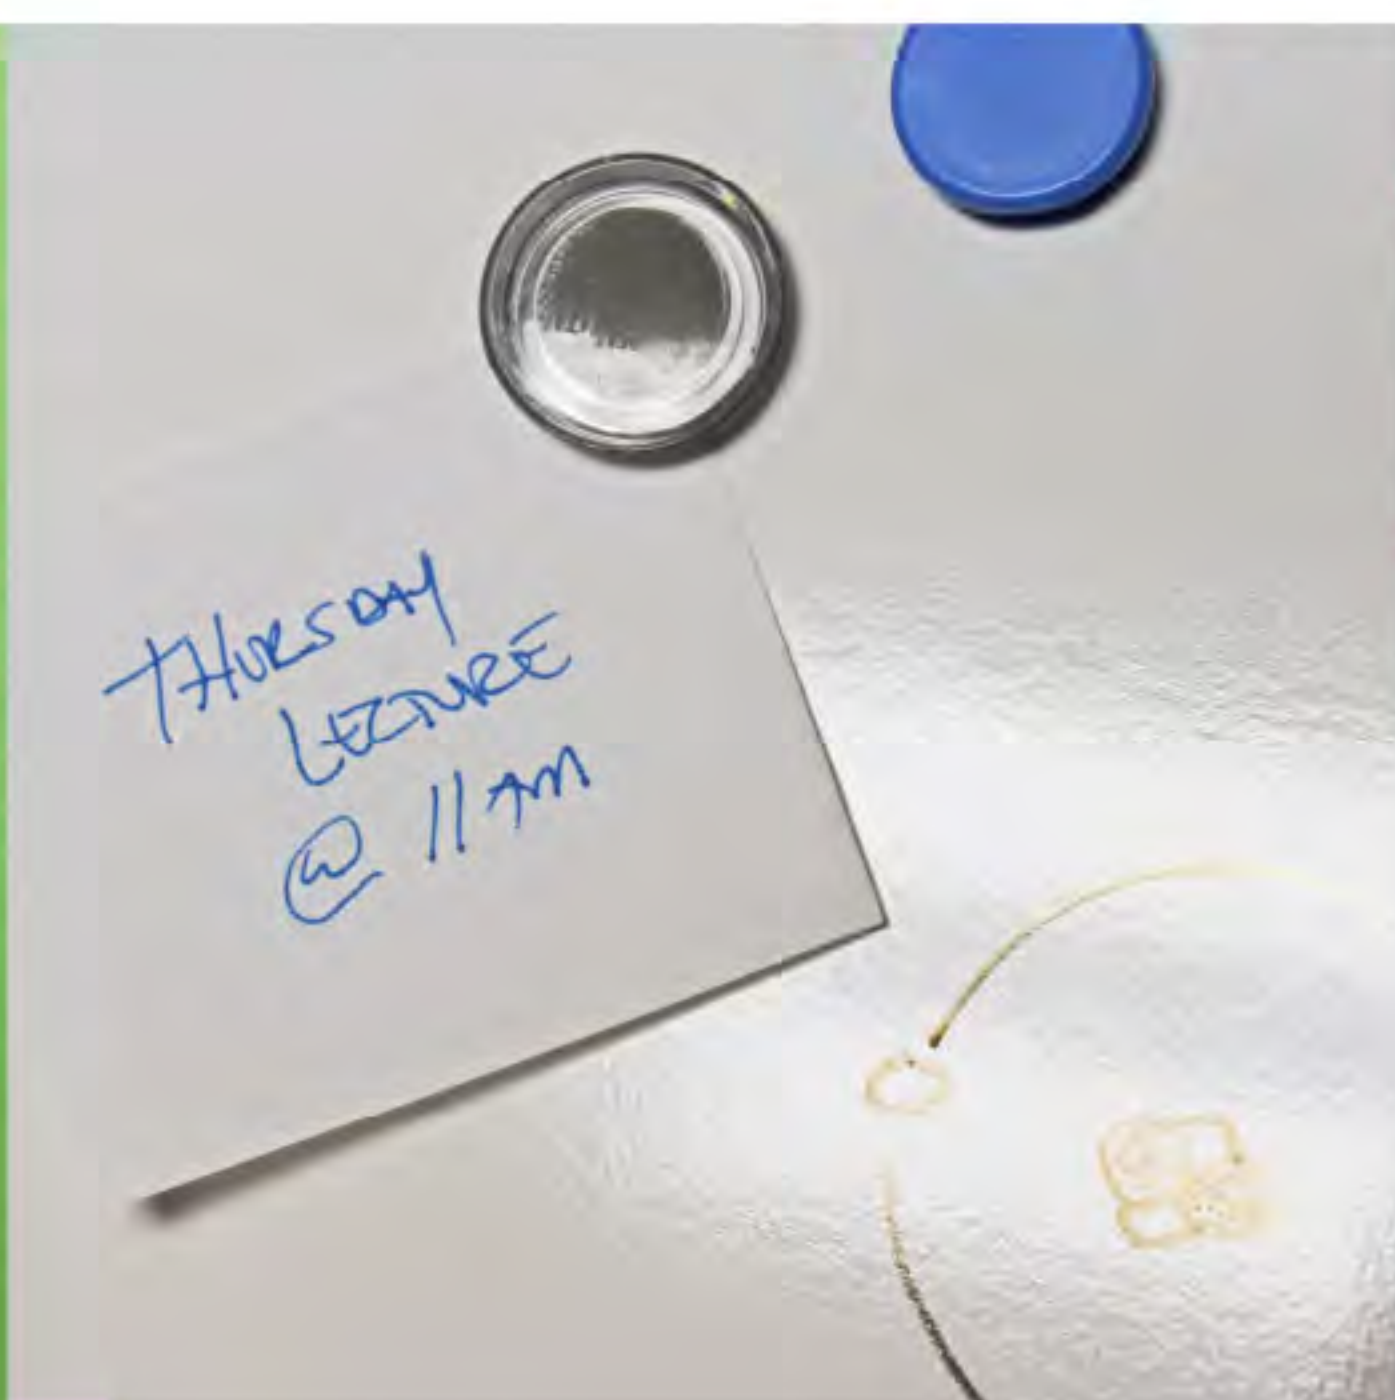

Vitrulan wallcoverings are made of 100% woven glass fabric, which provides superior strength and durability. CINCH Magnetic Wallcovering has a metallic coating that allows magnets to be directly applied to the wall – no need for separate cork or magnetic boards. The product, which comes in a smooth finish, is installed similar to traditional wallcovering – over any substrate. Then paint it any color, as well as adding a dry-erase coating, creating a virtually seamless high performance work surface. The result is a hard-working action wall that's clean, stylish and functional.

SCRIBIL

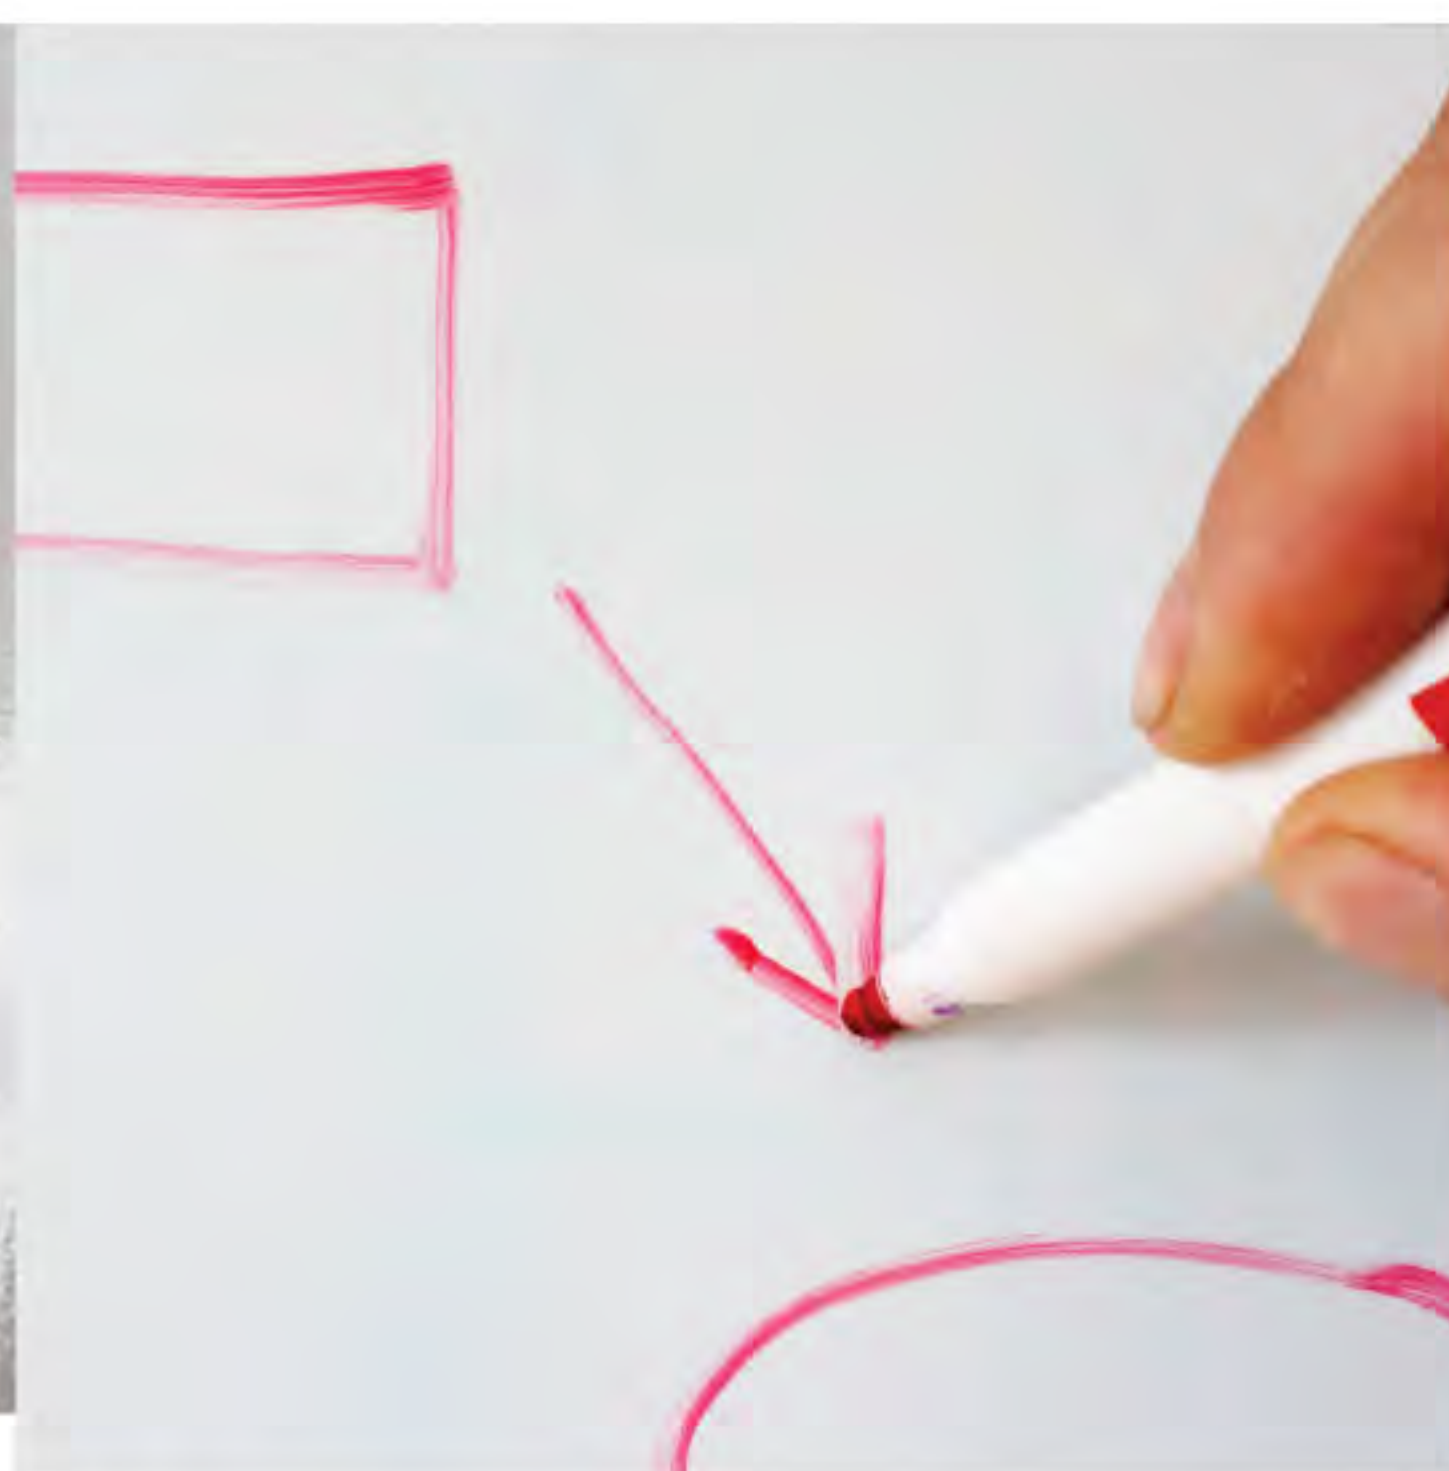

Got something on your mind? Then write it on your walls. With **Scribil Dry-Erase Coating** from Vitrulan, you can turn your walls into an idea board. **Scribil** goes on easily with a roller – just like regular paint. And its clear finish eliminates the limitations of traditional whiteboards, allowing any color to show through on your wall. For superior style and function, **Scribil** can go on over any surface including Vitrulan wallcoverings and **Vitrulan Cinch Magnetic Wallcovering**. The result is a professional-grade, dry-erase surface that's simple to write on and erase.

Paint it any color.

Magnetic walls.

Dry-Erase walls.

Blackboard walls.

FEATURES & BENEFITS

SCRIBIL DRY-ERASE COATING

- Clear, high-gloss coating creates a high-performance, write-and-erase finish when applied to any paintable surface.
- Whatever color your walls are will show through the Scribil coating, allowing for unlimited design options. Even make your wall a chalkboard.
- Fast drying, low VOC, water-based formula covers in ONE coat without need for primer.
- Any standard, any color, dry-erase marker can be used. For best performance, use Expo® Bold or Low Odor dry erase markers.
- For daily erasing and cleaning use a clean, dry-erase cotton cloth, or microfiber towel.
- Periodically use a clean damp cloth, dry-erase cleaner, or wipes to maintain surface.
- More writing surface with far less environmental impact than whiteboards.
- 5-year limited warranty from date of shipment.

SCRIBIL KIT CONTENTS

Part A: low odor, milky white, non-pigmented liquid emulsion
Part B: pale yellow polymer hardener with slight odor

CINCH MAGNETIC WALLCOVERING

- Walls become magnetic presentation and active areas, with option for dry-erase surface
- Available in a smooth surface
- Can be painted any color up to six times, without affecting magnetic properties
- Can be applied to any substrate, even cracked or uneven walls
- Highly resistant to wear and tear
- Offers unparalleled hygiene qualities and environmental benefits
- Virtually seamless surface means dirt and micro-organisms will not accumulate in pores and pockets
- Comes in 37.4" wide rolls that can be cut to any size
- Availability allows for quick delivery
