

## Repairing Damaged Areas on Vitrulan Fabric

## Repairing Damaged Areas on Vitruvan Fabric

The following tools are required for repairing damaged areas:  
Solvent, Water, Cloth, Sponge, Box Knife, Paint & Roller,  
Fabric Spatula, Painter's Spatula

Example of Damaged Area

## Repairing Damaged Areas on Vitruvan Fabric

The replacement piece is cut to the required size and coated with paint. The color setup on the wall should be considered.

Soak a cloth with solvent.

## Repairing Damaged Areas on Vitrolan Fabric

Slightly soak the paint coating around the damaged area with solvent (this will allow water to access the area quicker).

Soak a sponge with water.

## Repairing Damaged Areas on Vitrolan Fabric

Dampen the fabric well around the damaged area (dampening time: approx. 5-10 minutes).

Dip the cut piece of fabric in water (this will activate the adhesive).

## Repairing Damaged Areas on Vitruvan Fabric

Place the activated piece of fabric on the wall.

Mind the repeating pattern.  
(The threads should be in line as much as possible.)

## Repairing Damaged Areas on Vitruilan Fabric

Press the attached piece of fabric onto the wall with the fabric spatula.

Double-cut both layers of fabric to the desired size.

## Repairing Damaged Areas on Vitruilan Fabric

Lift off and remove the excess material.

Remove and keep the cut part ("repair part").

## Repairing Damaged Areas on Vitruilan Fabric

Carefully remove the damaged piece of fabric.

Soak the remaining fabric and adhesive with water once more.

## Repairing Damaged Areas on Vitruvan Fabric

Remove the soaked residues with a painter's spatula.

Position the cut piece of fabric and press it onto wall with the fabric spatula. Make sure there are no bubbles.

## Repairing Damaged Areas on Vitruan Fabric

Mended area prior to painting.

Close-up in the area of the double cut.

## Repairing Damaged Areas on Vitrolan Fabric

Mending of the transition area (if required, paint wall completely).

Repaired area after painting.
