

DURABLE & HYGIENIC
WALLCOVERING
YOU CAN CUSTOMIZE

VRP® WALL SYSTEM AQUA QUICK PASTING MACHINE

The Aqua Quick pasting machine has been specifically developed for the efficient handling of Vitrulan water-activated fabrics. *It is not suitable for applying standard dispersion adhesives.*

The pasting machine is equipped with an unwinding device for fabric rolls (with meter counter) and a dip tank to wet the adhesive-coated lengths of fabric. A microfiber wiper system ensures proper moistening of water-activated glass fabric.

Compared with conventional pasting machines, the Aqua Quick Pasting Machine *considerably reduces the installation time* and keeps clean-up to a minimum; simply drain the tank when you have finished.

The attached installation link, has been produced for Europe, the product and application is the *same for all Vitrulan US pre-pasted products*. The link below illustrates the features and benefits of the product.
